Name on Paint

Instructions: Following the steps below, you will be using MS Paint to create beautiful art based on your name. To open Paint go to Windows Key → Windows Accessories → Paint

1) Canvas size = 800 x 200   (File → Properties)

2) Type your name in a **textbox** using any font face you want AND a font size > 72 (Home → Tools → Text) I recommend you pick a font face that gives you a lot of room to draw in the letters!!!

If your first name doesn't have at least 6 letters, use your last name… or your initials too

If your name is more than 8 letters, you might want to drop some letters to make it easier for you to complete this project…

3) Use a different **colors** for each letter in your name (Home → Colors) → the paint bucket tool will help you with this. (Home → Tools → Fill)

4) Use the following tools/buttons at least 7 times each: (Home → Shapes) Change **colors** as you go from one shape to another and use at least 2 different line sizes for your shapes (Home → Size)

A. straight line   B. curved line   C. oval/circle
D. square/rectangle   E. triangle   F. pentagon   G. 6+ sides

Put one of each shape in each of the letters of your name (more than 1 depending on the # of letters in your name)

5) Airbrush a border (Home → Brushes) Make sure to move your mouse steadily so that your airbrush looks like airbrush and not a regular brush. Use line size 4.

*** Make sure you zoom in & out so you have an easier time using the different tools in steps 3 to 5. ***
